About me

Passionate and skilled Frontend Developer with expertise in React, Tailwind CSS, and Supabase, specializing in building intuitive and scalable web applications. I have a strong background in state management, API integration, and UI/UX design, ensuring high-performance applications that enhance user experiences. Beyond development, I am dedicated to mentoring aspiring developers, guiding them through the fundamentals of web technologies and best practices in frontend development. Through workshops and one-on-one sessions, I help students transition from learning to building real-world projects with confidence. My commitment to continuous learning and knowledge-sharing drives me to stay at the forefront of modern web development trends.

Experience

Beginner's Track Mentor OCT 2024 - Present
Google Developer Group AASTU

As a web development mentor, I guide beginners through HTML, CSS, JavaScript, and React with a hands-on approach. I emphasize real-world projects, best practices, and problem-solving, helping students build confidence and industry-ready skills. Through workshops and one-on-one sessions, I support their transition from theory to application, empowering them to advance in their careers.

Front End Development Jun 2024 - Jan 2025
ALX - Ethiopia

Completed an intensive 6-month programme focused on mastering modern front-end development. The curriculum included HTML, CSS, JavaScript, and ReactJS, along with responsive design and version control using Git. Practical, project-based learning allowed me to build user-centric web applications while developing essential professional skills such as teamwork, problem-solving, and communication.

React Frontend Development Feb 2023 - May 2024
Google Developers Group

As the Lead Front-End Developer for the Hackathon and Capstone Project at GDG AASTU, I directed the development of a social media app for sharing user experiences and content. Utilizing Redux for efficient state management and an AI-driven filtering system, I focused on enhancing user interactions. This role strengthened my skills in collaborative development and problem-solving, and I received a certification for my contributions to the project.
